

Year 7 Homework	15th April 2019	
☞ English	Week 1 – learn the spelling and definitions of our new poetry based vocabulary for a test next Tuesday 23rd April	Mrs F Birtwistle
☞ Maths	Year 7 – Back to the yellow sheets again this week! We've been looking at understanding sequences this week, and thinking about how we can describe sequences algebraically. As always, please make sure that students are attempting the vast majority of the revision questions on the left-hand side, as well as completing the fluency section on the top-right (which covers work from this week) and then the more difficult problem-solving questions at the end. If there are any problems, please feel free to email me on jhammond@samuelkings.cumbria.sch.uk .	Mr Hammond
☞ Science	Year 7 will be starting a new unit looking at the earth. They will begin by looking at the structure of the earth (core, mantle and crust) and then moving onto the rock cycle and the different types of rock that make this up. Their homework will be GCSE questions based on this topic. They should do at least 3 of the 4 questions set. Due in Thu 18th Apr P2	Mr D Nicholson
☞ Humanities		Mr I Johnson
☞ Art & Design		Ms R Senior
☞ Languages	Each Tuesday we have a vocabulary test. The attached sheet shows which words need to be learned each week. These words and phrases are used in our lessons so it is important students are familiar with them prior to our lessons in order to maximise progress and language skills within the classroom.	Mrs N Johnson
☞ ICT		Mr M Fletcher
☞ Catering		Miss Timmons
